

IN THE CLAIMS:

Please amend claim 4, as indicated.

A marked-up version is provided hereinbelow indicating deleted subject matter within brackets ([])) and newly-added material with underscores. This marked-up claim is intended to communicate details of the amendments thereto. A substitute page incorporating the amended claim, as required, is also included herewith.

---

4. (Amended) The process as recited in claim 3, wherein the cation in said phosphate salt is selected from the group consisting of cations of: ammonium, potassium, sodium, lithium, and water soluble alkaline metal cations.
